Transponder Key (Lexus series)

Description :

The transponder key has the same figure with the tradition key but has one RFID transponder embedded in the plastic head. When a vehicle Anti-theft system combine with the Engine Control Module (ECM), the transponder key can enhance vehicle security because the vehicle will not start if a tradition key or a wrong code transponder key inserted into the ignition cylinder. This series is for Lexus vehicle, transponder key without remote control.

Specification :
